TERM	LETTER	MEANING
1. Credential stuffing	_____	A. A device-unlock login that only works on the real site and has no password to steal
2. Password reuse	_____	B. Trying leaked usernames and passwords from one site on many other sites
3. Phishing kit	_____	C. A short login code that is only for you and should never be shared
4. SIM swap	_____	D. A tool that creates, stores and fills a unique strong password for every account
5. One-time code	_____	E. Typing the number shown on the login screen into your app to approve only logins you started
6. Number matching	_____	F. Moving your phone number to a criminal's device so your calls and texts go to them
7. Passkey	_____	G. Ready-made fake login pages that can relay your password and code to the real site
8. Password manager	_____	H. Using the same password on more than one account, so one leak unlocks several

Think about it

Text-message codes can be phished or redirected by a SIM swap. Should people still use them?
